

# FORATOM Webinar series

---

Security of supply in COVID19 times. The importance of nuclear:

- Webinar 1 – Measures implemented by the nuclear sector in order to ensure its ability to continue to supply electricity to the grid.
- Webinar 2 – Impact of COVID19 on markets and grids. How they have responded. How to make the power system more resilient to ensure security of supply in the long-term
- Webinar 3 – Ensuring a clean future for Europe. Which policies will support sectors capable of generating clean economic growth and jobs in Europe as we come out of the crisis.

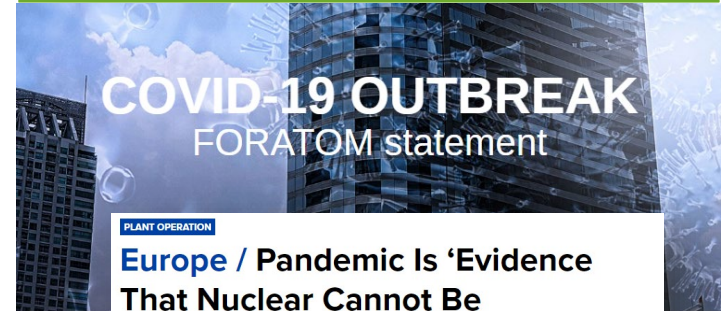

# Webinar 1 – Measures implemented by the nuclear sector

What FORATOM has done since the beginning of the outbreak

- Constant contact with **all** our members
- Gather and publish information onto our website with country analysis from our members
- Active in media promoting messages focused on how the industry responded to the crisis

=>Nuclear industry strenghts and challenges...

Dedicated & regularly updated section on FORATOM's website

PLANT OPERATION

## Europe / Pandemic Is 'Evidence That Nuclear Cannot Be Disregarded'

By David Dalton
